- <sup>42</sup> Natural Resources Canada, Office of Energy Research and Development, "A Review of Canadian Energy Research and Development Expenditures 1983-1995," (September 1997). The data included in this document were collected by a survey conducted by the Office of Energy Research and Development (OERD). OERD advises that the data be treated with caution due to the survey's high level of aggregation designed to protect confidentiality. Moreover, differing definitions of energy R&D may have been used by different survey participants; thus, some participants responses might include expenditures on demonstrations and pilot projects, while other may have omitted these expenditures in their responses.

- <sup>49</sup> Technology Partnerships Canada (TPC) is a technology investment fund established to contribute to the achievement of some of Canada's major economic and environmental policy objectives, such as increasing economic growth, creating jobs and wealth, and supporting sustainable development. TPC advances and supports government initiatives by investing strategically in research, development and innovation in order to encourage private sector investment, and so maintain and grow the technology base and technological capabilities of Canadian industry. TPC also encourages the development of small and medium-sized enterprises (SMEs) in all regions of Canada. See Technology Partnerships Canada <http://strategis.ic.gc.ca/SSG/tp00167e.html>
